PROFILE

A motivated Mobile App Developer with 1.5 years of experience, eager to contribute to a reputable organization's growth. Skilled in managing independent projects and collaborating effectively within teams. Always looking to expand my knowledge and take on new challenges to enhance both my skills and the company's success.

EMPLOYMENT HISTORY

Mobile App Developer at Tibicle LLP, Ahmedabad
April 2024 – April 2025

Project Title	Technology used, Description
Hope	Languages used: Flutter + Android The HOPE app is the ultimate companion in the journey towards recovery and enhanced well-being. Designed to seamlessly integrate with the HOPE wearable device, this app empowers you with the tools to conduct personalized physiotherapy sessions, monitor your progress, and regain your independence, all from the comfort of your home.
JustMove	Languages used: Flutter This app gives users a personalized view of their activity levels at work and leisure. It helps employees track and improve their activity with a motivating level system—progressing as they stay active and dropping if they don't. The app also offers ongoing challenges, team competitions, and fun videos to promote a healthy, positive work culture.

Mobile App Developer at Cloudedots Tech Pvt Ltd, Rajkot
Noveber 2023 – March 2024

Project Title	Technology used, Description
Paramount App	Languages used: Flutter I developed an e-commerce app using Flutter, enabling users to browse and purchase household products. The app includes features like adding items to the cart, liking products, and viewing order details with costs. I also integrated APIs using Postman to ensure seamless functionality. Gained hands-on experience with flutter, focusing on UI enhancements and code optimization, Database Design, API Integration. Implemented new features, optimized performance & resolved bugs.
